

ARNE NLS ADVISOR

**THE FIRST EVER CLINICAL
DECISION SUPPORT SYSTEM
FOR NEWBORN RESUSCITATION
PROCEDURES.**

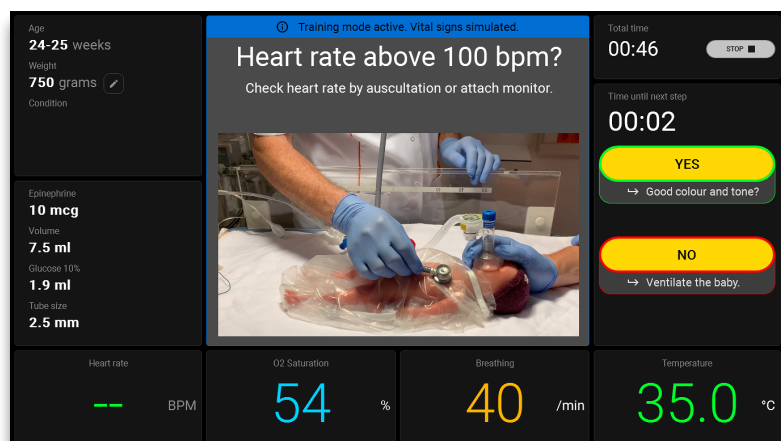

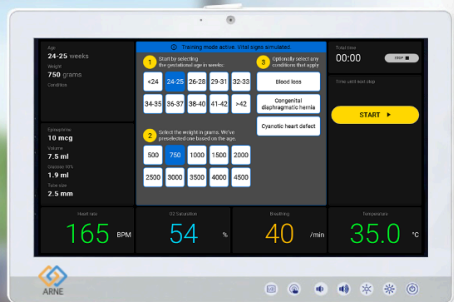

Nearly 10% of all newborn babies have a cumbersome start and need life support directly after birth. Adherence to the NLS protocol during these stressful situations is challenging and mistakes are easily made.

Scan the QR code and watch the video to learn how to prevent mistakes and improve outcomes using the ARNE solution.

Less mistakes
better survival

www.arne.health

The all new ARNE system.

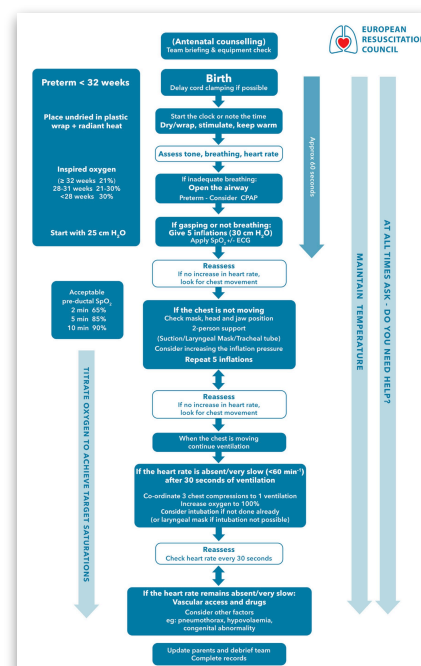

An unique and powerful clinical decision support system designed to adhere to the Newborn Life Support (NLS) protocol and give audio and visual guidance during newborn transition.

Resulting in:

- Reduction of cognitive load
- Less mistakes & missed steps
- Faster resuscitation procedures
- Better guideline adherence

VITAL SIGN

Less mistakes
better survival
