

Newborn life support Your NLS Advisor

Discover how the new **ARNE NLS Advisor** can empower your resuscitation team and enhance delivery room management at your hospital.

Newborn Life Support (NLS) can be a complex and high-pressure process. A clinical decision support system can help your resuscitation team improve adherence to NLS guidelines and optimize patient outcomes.

ARNE Health offers on-site NLS training at your hospital, helping your team integrate the ARNE NLS Advisor into your delivery room workflow. Gain hands-on experience with the full potential of this innovative tool.

Shanna, ARNE's Clinical Product Specialist — a seasoned NICU nurse and certified NLS instructor — looks forward to training you and your team at your facility.
