

ARNE NLS ADVISOR

CLINICAL DECISION SUPPORT FOR NEWBORN RESUSCITATION.

ARNE NLS ADVISOR

The First-Ever Clinical Decision Support System for Newborn Resuscitation.

Nearly 1 in 10 newborns need life support right after birth.

In these high-stress situations, **strict adherence to the NLS protocol** is critical, but errors can happen easily.

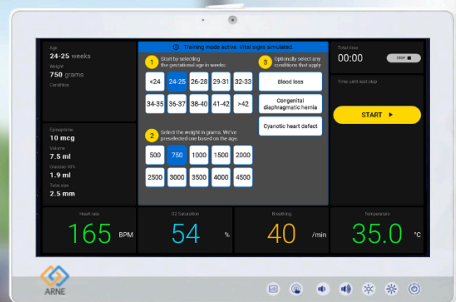

- **ARNE NLS Advisor** guides clinical teams step-by-step through neonatal resuscitation in real time.
- Reduces cognitive load.
- Enhances protocol compliance.
- Improves outcomes for our most vulnerable patients.

The All-New ARNE System

A Unique and Powerful Clinical Decision Support Tool

The **ARNE system** is specifically designed to support adherence to the **Newborn Life Support (NLS)** protocol, when it matters most.

- Real-time clinical guidance
- Audio and visual prompts
- Supporting safe and effective newborn transition

Whether you're a seasoned professional or under high pressure in the delivery room, **ARNE** is your reliable assistant for structured, confident, and protocol-driven care.
